Quantity per box 1 pcs

**FROST is a 3-in-1 cooler that combines the functions of a cooler evaporative, fan and humidifier to provide you with targeted relief at every moment of activity. With its 3-speed fan and 80 watts of power, it can generate an airflow of up to 600 m<sup>3</sup>/hr, conveniently controlling from remote with the remote control.**

**Refreshing water:** An economical alternative for your comfort! FROST uses water as an economical way to cool the environment. The water evaporates directly from the reservoir into the airflow, refreshing your skin gently. In addition, the included cooling blocks enhance further the cooling effect.

**Addormentarsi in tutta serenità:** Un sonno rinfrescante garantito! Grazie al timer integrato (fino a 12 ore), puoi addormentarti tranquillamente sapendo che FROST si spegnerà automaticamente, risparmiando energia. In combinazione con la modalità sleep silenziosa, potrai goderti un piacevole sonno rinfrescante.

**Cooling in every corner:** A coolness spread everywhere! With the oscillation option, FROST spreads a pleasant breeze to every corner of your living room or office.

**Completely portable:** Freshness wherever you go! No matter where you wish to enjoy a cool breeze, it goes with you everywhere thanks to its convenient wheels. What's more, thanks to its compact, FROST easily finds space in all rooms, making it the ideal companion to face the summer.

**Economical:** Refreshing for the environment and your wallet! With FROST, cooling off becomes an eco-friendly and affordable gesture. FROST consumes up to 90% less energy than a regular air conditioner, allowing you to enjoy freshness without worrying about your utility bills.
